**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-48 are rejected under 35 U.S.C. 102(e) as being anticipated by  
Fitzgerald US 6,680,495.

Fitzgerald discloses a device and method of making including growing an epitaxial semiconductor device structure (102, 104) on a substrate (100), said epitaxial semiconductor structure (102, 104) and substrate (100) comprising an emitter (104) adapted to emit light in response to a bias; flip-chip mounting said emitter (104) on a submount (106) such that said epitaxial semiconductor device structure (102, 104) is sandwiched between said submount (106) and said substrate (100), and etching said substrate (100) off said epitaxial semiconductor device (102, 104) by utilizing an etch environment that etches said substrate (100) substantially faster than said epitaxial semiconductor structure (102, 104) (see figs. 1A-D and related text). Also, disclosed is that the structure can be an RCLED having a first and second mirror layers and that the first mirror can be sandwiched between the device and the submount (see col. 5, lines 12-27) and that the various materials can be any which are well known in the art.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Picardat whose telephone number is 571-272-1841. The examiner can normally be reached on Monday-Thursday 7:00-5:30.
